

Exponent[®] Insecticide Synergist is an emulsifiable concentrate designed to be tank mixed with other insecticides and acaricides. Exponent increases susceptibility to insecticides although it has no insecticidal properties of its own. It helps provide a higher level of control over a broad number of pests.

- Interferes with certain mechanisms of insecticide resistance by inhibiting the mixed function oxidase enzyme system (P-450)
- Increases killing power by making insects more susceptible to insecticides
- Tank mix with other insecticides to improve insect control
- For use in livestock and poultry areas

Package Sizes Available:

- 1 Pint (6 per case)
- 1 Quart (6 per case)
- 1 Gallon (4 per case)
- 55 Gallon drum

Exponent[®] is a registered trademark of MGK.
